

Vaxxinova develops, produces and markets a wide range of innovative vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

Vaxxinova belongs to the EW Group, a Germany based family-owned company specialized in animal genetics, animal nutrition and animal health. The EW Group is highly committed to R&D and active in more than 100 countries. Vaxxinova is a young and international company, headquartered in Nijmegen, the Netherlands with multiple sites across the world.

We invest in research to achieve our ambitious goals and we are expanding our research and development department. We are looking for talented colleagues who enjoy working in an ambitious, dynamic and flexible research environment with opportunities for further professional development.

The Vaxxinova R&D department in Münster (Germany) is looking for a full-time

Research technician (f/m)

Responsibilities

- Participate in and contribute to innovative research projects to develop vaccines for veterinary use.
- Planning and execution of experiments in collaboration with the project leader and other (international) team members.
- Research projects may involve different areas of expertise, e.g. virology, bacteriology, cell culture, molecular biology or cell biology.
- Setting up and development of new techniques and assays.

Work and report research data in accordance with internal and GLP guidelines.

Requirements

- Bachelors (BSc) degree or higher (or equivalent) in (medical) biology, biochemistry or similar.
- Working experience in a research environment is an advantage.
- Experience in areas of expertise such as virology, tissue culture, cell biology or molecular biology.
- Ability to think analytically, problem-solving skills, drive to succeed.
- Ability to work independently, e.g. in the planning of experiments.
- Professional proficiency in English is a requirement.
- Experience with working according to GLP guidelines is an advantage.

Terms of Employment

We offer exciting positions with the opportunity to work in a professional R&D surrounding. The primary and secondary benefits are excellent and include the possibility to follow subject-specific trainings.

Application

Requests for information and applications including a detailed CV can be directed to: Mrs. Abir Kaddor-Isikay, Human Resources, at +49 (0) 251 284 126 27, at jobs@vaxxinova.com
