

## EXTENSION OF OUR TEAM

Vaxxinoa develops, produces and markets a wide range of innovative vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

Vaxxinoa belongs to the EW Group, a Germany based family-owned company specialized in animal genetics, animal nutrition and animal health. The EW Group is highly committed to R&D and active in more than 100 countries. Vaxxinoa is a young and international company, headquartered in Nijmegen, the Netherlands with multiple sites across the world.

We invest in research to achieve our ambitious goals and we are expanding our research and development department. We are looking for talented colleagues who enjoy working in an ambitious, dynamic and flexible research environment with opportunities for further professional development.

The Vaxxinoa R&D department in **Münster** (Germany) is looking for a full-time

### **Virologist / cell biologist (f/m)**

#### **Responsibilities**

- Design and execution of research projects to develop and register innovative veterinary vaccines to protect livestock against viral pathogens.
- Collaboration with scientists and technicians in international project teams.
- Design, development and implementation of cutting-edge *in vitro* and *in vivo* technologies and protocols in the field of (molecular) virology, cell biology and vaccinology.

- Identification of opportunities for new products or technologies and preparation of project proposals to translate these into research projects for the development of innovative vaccines.
- Working in accordance with internal and GLP guidelines.
- Reporting both internally and externally through e.g. project reports, papers and patent applications.
- Supervising one or more technician(s).

### **Qualifications**

- Creative and exploratory mindset with a drive to achieve ambitious goals.
- You are not afraid of challenges and enjoy solving scientific problems.
- PhD (or similar) in life sciences with emphasis on virology, preferably followed by several years of post-doc or industry experience. Experience in areas such as molecular virology, virological assays and techniques.
- Knowledge of veterinary pathogens is an advantage.
- Knowledge of vaccine registration procedures is an advantage.
- Experience with cell biology and molecular biology.
- Good scientific track record as demonstrated by scientific publications and/or patents.
- Excellent English proficiency (written and spoken).

### **Terms of Employment**

We offer exciting positions with the opportunity to work in a professional R&D surrounding.

The primary and secondary benefits are excellent and include the possibility to follow subject-specific trainings.

### **Application**

Requests for information and applications including a detailed CV can be directed to:
