

List of possible pathogens to be used in Vaxxinova[®] vaccines

Bacterial Pathogens

Actinobacillus spp.
Actinomyces spp.
Aerococcus spp.
Aeromonas spp.
Aliivibrio spp.
Avibacterium spp.
Bacteroides spp.
Bibersteinia spp.
Bordetella spp.
Brachyspira spp.
Campylobacter spp.
Clostridium spp.
Corynebacterium spp.
Edwardsiella spp.
Enterobacter spp.
Enterococcus spp.
Erysipelothrix spp.
Escherichia spp. (including SRP-E. coli-antigen)
Flavobacterium spp.
Flexibacter spp.
Francisella noatunensis spp.
Fusobacterium spp.
Glaesserella (Haemophilus) spp.
Gallibacterium spp.
Haemophilus spp.
Helcococcus spp.
Histophilus spp.
Klebsiella spp.
Listonella anguillarum spp.
Mannheimia spp.
Moraxella spp.
Moritella spp.
Mycobacterium spp.

Mycobacterium spp.
Mycoplasma spp.
Ornithobacterium spp.
Pasteurella spp.
Peptostreptococcus spp.
Photobacterium spp.
Piscirickettsia spp.
Prevotella spp.
Pseudomonas spp.
Renibacterium salmoninarum
Riemerella spp.
Salmonella spp.
Schaalia spp.
Serratia spp.
Staphylococcus spp.
Streptococcus spp.
Tenacibaculum spp.
Trueperella spp.
Vibrio spp.
Yersinia spp. except Yersinia pestis spp.

Viral Pathogens

Avian Adenovirus
Avian Astrovirus
Avian Influenzavirus A, subtype H1NX (turkeys, chickens)
Avian Influenzavirus A, subtype H3N1 (turkeys, broiler breeders, laying hens)
Avian Influenzavirus A, subtype H6NX (turkeys, also in combination with H9)
Avian Influenzavirus A, subtype H9N2 (turkeys, broiler breeders, laying hens)
Avian Influenzavirus A, subtype H9N3 (turkeys, broiler breeders, laying hens)
Swine Influenzavirus A, subtypes H1NX, H3N2 (pigs)
Avian Reovirus
Infectious-Bronchitis-Virus
Rotavirus
